FREQUENTLY ASKED QUESTIONS

We really appreciate your interest in sharing your solution with the Social Innovation in Health Initiative (SIHI) Indonesia. Below we have answers to some frequently asked questions by innovators.

What is Social Innovation in Health Initiative?
Social Innovation in Health Initiative is a new lens to approach health care delivery and development. It is a creative solution to the systemic challenges in health to achieve vulnerable populations.

Social innovation helps to make healthcare delivery more inclusive, effective, and affordable for all people. Social innovations improve the health and wellbeing of people and hold the transformative potential to achieve a stronger and more resilient health system in Indonesia.

Social innovation is contrary to an invention or traditional innovation in that it is not done in the pursuit of ‘newness’ or great profit margins but to improve quality of life, achieve justice and equity, and positive social change.

Am I an Innovator?

If you have developed a creative solution to a healthcare delivery problem experienced in your community, then you are an innovator! If you have tried something new or different to make healthcare more affordable, accessible, or effective, then we want to hear from you!

You could be a faculty member of any university, a frontline health worker, an entrepreneur, a government official, a student, or a community member. You could be working in a not-for-profit organization, a company, a public-sector institution, or a university. We are searching for passionate and inspirational individuals from all walks of life!
**Who Is SIHI?**

The Social Innovation in Health Initiative (SIHI) is a network of passionate individuals and institutions combining their skills and resources in support of key activities to promote social innovation in health.

This network of passionate individuals and institutions sharing a common goal to advance social innovation in achieving Sustainable Development Goals (SDGs) and improving the lives of communities in low- and middle-income countries. Our mission is to unlock the capacity residing within the actors of the health system to advance social innovation.

In 2014, The network was launched through joint efforts of the Bertha Centre for Social Innovation and Entrepreneurship at the University of Cape Town, the Skoll Centre for Social Entrepreneurship at Oxford University, the London School of Hygiene and Tropical Medicine, and TDR, the UNICEF/UNDP/World Bank/WHO Special Programme for Research and Training in Tropical Diseases.

The SIHI network expanded to include additional partners from low- and middle-income countries: University of Malawi College of Medicine in Malawi; Makerere University School of Public Health in Uganda; University of Philippines Manila College of Medicine; Social Entrepreneurship to Spur Health initiative in China; and Centro Internacional de Entrenamiento e Investigaciones Medicas (CIDEIM) in Colombia in collaboration with ICESI University and the Pan American Health Organization in 2017.

Since 2020, SIHI has been collaborating with Universitas Gadjah Mada to establish SIHI Indonesia under the SIHI Global Hub. Through SIHI Indonesia, we would like to facilitate social innovation actors in Indonesia to share ideas, develop self-capacity, and introduce their innovations to the international level.

**What is SIHI Crowdsourcing?**
SIHI Indonesia believes that the grassroots movement and health programs can transform Indonesia's health system in the future. SIHI Indonesia crowdsourcing is an activity to find various innovative movements in Indonesia that have great potential to overcome Indonesia's health problems.

Submit your social innovation story and participate in the SIHI Indonesia workshops. Through this crowdsourcing, Let's get the opportunity to meet social innovators, be involved in training, get seed funding, and publish your innovations!

**Why should I share our solution?**
There is no doubt that Indonesia has great innovators who have successfully solved some of healthcare’s biggest problems. We believe that by learning from innovators, like you, we can not only improve health in Indonesia but also share the learning with other countries. We can improve our healthcare system together!

You can benefit in several ways:
- To meet and share ideas with other social innovators.
- To disseminate your social innovations at both national and global levels.
- Grab the opportunity to get seed funding for developing your social innovation.
- Get hands-on experiences and one-on-one mentoring with the experts to explore the critical aspects and strategies of your social innovation, to learn and hone your skills in documenting outputs and impacts of your social innovation, and to publicize your social innovation through writing.

**Is my solution eligible?**
Your solution is eligible if it meets the following conditions:
- Focused on improving healthcare delivery in any of the following areas:
Health emergency responses
Healthcare efforts on disease controls
Health promotion and primary care

- The solution should have been implemented in Indonesia
- Operational for more than 6 months. We are not looking for new ideas but existing solutions.
- We are looking for solutions that work collectively with communities to increase capacity and conditions of health. We are not considering any scientific solutions such as drugs or advanced medical devices.
- The application should have been fully completed. All incomplete forms will be excluded.

How do I submit a solution?
You can submit a solution in two ways:

- Download the form in Bahasa Indonesia or in English and complete the form, then email it to us at indonesia@socialinnovationinhealth.org.
- Or you can visit the SIHI Sharing Platform at www.socialinnovationshare.org and fill up the online form.

How do I submit a solution on www.socialinnovationshare.org?

STEP 1: Visit our SIHI Sharing Platform at www.socialinnovationshare.org

STEP 2: Create a new user account using your email address and a password you select. An email will automatically get sent to you when you sign up so you can verify your account. Please click on the link in this email to activate your account. You will then be able to log in using these details.
**STEP 3:** Select your country or region “Indonesia” by clicking on the “topic” button in the box with the appropriate flag (these lead you to your country’s topic homepage).

**STEP 4:** Read the submission tips online, and download the FAQ document to guide you through the process.

**STEP 5:** Download the SIHI Share Sample Submission Form. This will allow you to read the questions and prepare your response ahead of time.

**STEP 6:** Click on the icon to go to the online submission form. This will take you to a landing page where you can continue to the submission form and share your solution, or view any previously submitted solutions (you are able to submit different solutions if you have more than one you wish to share)

**STEP 7:** You can save and return to your online form at any time and as often as you like before the closing date. If your internet cuts out, you will not lose your data as everything is automatically saved. However, once it is submitted, you are unable to revise it.

**STEP 8:** Upload any videos or images you feel capture the work you do. You can submit a maximum of 10 photos and videos. It is limited to 100MB for each video. For 10 images, please send out photos with a maximum size of 2MB each. This is an optional step that is available to you once you complete the nomination form and on the country topic homepage if you wish to do it at a later point.

**STEP 9:** If you have done any formal evaluations or studies, please upload the related documents. This is an optional step that is available to you once you complete the nomination form and on the country topic homepage if you wish to do it at a later point.

**STEP 10:** The SIHI team will get in touch with you after the call closes. Your submission will be reviewed by an external expert panel.

**How does my application get selected?**

All eligible solutions received will be submitted to an independent expert review panel. This panel will consist of experts in innovation, public health, social entrepreneurship, and medicine. Their task will be to assess your solution according to the call criteria. Following the selection process, there may be a need for our team to inform you by email. Once you have passed through the selection process successfully, a shortlist of successful applicants will be announced.
